Exploitation board

◆ Point about Project officer recommendation on web site

Public deliverables will be published in the web site. So, the EB decided to review the deliverables before making them public. Some of them or some parts of them should stay confidential.

Some deliverables or specific information can be delivered on demand.

◆ Communication actions

There is a new research program of AIEA. On the contract, only CEA appears. Discussion with a jurist is opened to prepare a contract with CEA acting "on behalf the consortium". For that CEA must receive a mandate of each partner.

◆ Press release in VMEBus Systems (professional newspapers) "Real life VME applications".

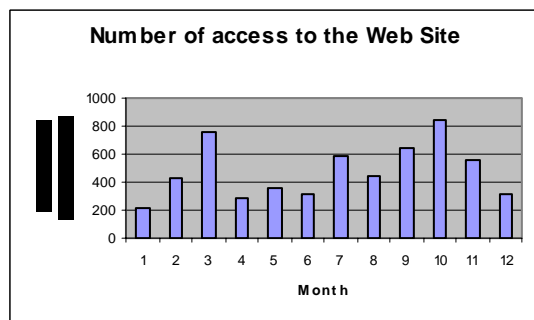

◆ Feedback on conference participations since September 2005

Presentation of a conference on terrorism in Balkans held in Belgrade in November 2005. Euritrack project has been evocated.

Executive Committee

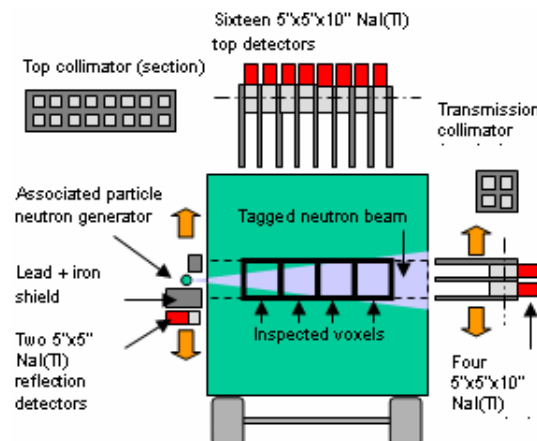

Each partner agreed to conduct tests in Zagreb, during the first semester of 2006.

During these tests, the components of the Tagged Neutron Inspection System will be tested separately, assembled in order to establish the performance of the system and confirm the criterion of success defined in the contract.

Technical meeting 19 January 2006

◆ Inspection System Overview

During the first semester 2006 the components of the final **Tagged Neutron Inspection System (TNIS)** will be tested:

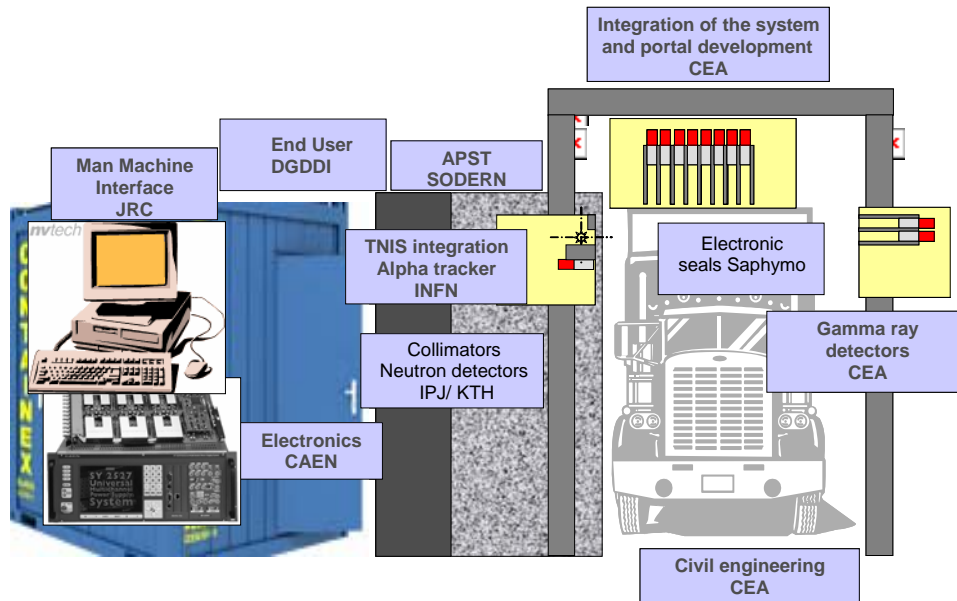

- Front end electronic provided by **CAEN**,
- The gamma ray detectors provided by **CEA**

These components will be used in order to perform preliminary tests in Zagreb, using an **IRB** neutron generator.

Other equipments should be tested and ready for integration test:

- The alpha tracker system provided by **INFN**,
- The Associated particle sealed tube (APST) provided by **SODERN**,
- The neutron detectors provided by **IPJ** and **KTH**.
- The Information system developed by **JRC**.
- The electronic seals provided by **Saphymo**.
